

**TARONGA
FOUNDATION™**

GIVING LIFE

“It has made me think that there is enough love and hope yet in the world and that small, independent people can help to make miracles”

-a friend of a generous donor who remembered us in her Will.

A gift to Taronga in her Will has enabled one of our best loved supporters to help save the lives of Zoo animals and native wildlife brought injured or sick to Taronga’s veterinary hospital. This kind legacy meant we could purchase a digital radiography machine for the Taronga Wildlife Hospital. This machine gives faster diagnosis, reduces radiation exposure and shortens the time an animal spends under anaesthetic.

Thanks to this we can send images electronically, meaning we have access to opinions from specialists around the world. As well, the high quality images are a wonderful tool for teaching the young vets of tomorrow.

Through her thoughtfulness in providing generously to the Taronga Foundation in her Will, this cherished donor continues to care for animals long after her lifetime.

Through a gift in your Will, you too can help improve the lives of our animals from tiny feather tailed gliders to Asian elephants.
